 The Stockholm Conference: An ozone zone with TOORPZRP. B. Fleming. 8:13.
 Environmental concerns put another demand on pulp producers. S. Jamieson. 9:27.
 Bleaching and deresination of sulphite pulp: Effects of ClO_2 substitution. G. Teodorescu et al. (T209) 9:39.
 Bleaching of groundwood pulps at temperatures up to 95°C. J. Kappel et al. (T229) 9:60.
 Nitrogen pressure transfer of chlorine. D. Beach et al. (T263) 10:41.
 Oxygen bleaching of magnesium sulphite pulp. M. Bokstrom. (T279) 11:38.
 Reducing TOCl with the OxO process. Lachenal et al. (T297) 12:101.
 BOILERS. See RECOVERY.

C

CALENDAR. Annual five-year calendar. S.M. Stevenson. 1:65.
 CALENDERING
 Pilot calendering of newsprint using modern concepts. R.J. Futcher et al. (T79) 4:35.
 Steam showers in the machine calendering of newsprint. M.F. Gratton et al. (T107) 4:64.
 Soft-compact calender: In-line operation for improved newsprint qualities. P. Svenka. (T271) 11:28.
 Soft nip calendering: The latest state of the art for a wide range of grades. R. Kurtz et al. (T308) 12:113.
 CAPITAL EXPENDITURES. Environmental spending continues although capital projects show an overall drop (survey). G. Rodden. 6:17.
 CARBONATE
 Coping with carbonate: Neutral pH rosin sizing. P.C. Rostek et al. (T169) 6:60.

Calcium carbonate filler optimization for alkaline paper. M.D. Strutz et al. (T202) 8:39.

CAUSTICIZING/ RECAUST.

Pressure disc filters in the recausticizing process. B. Sandvold et al. (T130) 5:76.

Development of a fluidized bed chemical recovery boiler. C. Nagai et al. (T258) 10:35.

CHEMICAL HANDLING. Nitrogen pressure transfer of chlorine. D. Beach et al. (T263) 10:41.

CHEMICALS: REVIEW AND FORECAST. Changes in bleaching and papermaking having major effect on chemical use. J. Piccione. 1:15.

CLARIFICATION. Pressure disc filters in the recausticizing process. B. Sandvold et al. (T130) 5:76. See EFFLUENT TREATMENT.

COATING

The ambitious coater project at Island Paper Mills is delivering what the market wants. S.M. Stevenson. 3:37.

New products improve opportunities to add value to paper and board. P.N. Williamson. 8:9.

An evaluation of coater blades. Campbell et al. 9:23.

COMPUTER PROGRAMS

Selecting the right simulation tool for the job. S.K. Schroderus et al. (T36) 2:27.

A comparison of spreadsheet simulations: Iterative versus direct solutions. W. Frazier. (T253) 10:29.

COMPUTERS

Maintaining your computer. N. McCubbin. 1:88.

The elimination of typing. N. McCubbin. 2:54.

When you buy, heed these points. N. McCubbin. 3:92.

Upgrading your video display. N. McCubbin. 4:78.

Fax and modems come together. N. McCubbin. 5:104.

Using empirical data in spreadsheets. N. McCubbin. 6:64.

Fax'n figures. N. McCubbin. 7:40.

Will less brightness cure AOX blues? N. McCubbin. 8:48.

Upgrading with new DOS. N. McCubbin. 9:71.

Sending drawings by fax. N. McCubbin. 10:50.

Improved laser printing. N. McCubbin. 11:46.

Your little black book. N. McCubbin. 12:139.

CONFERENCES/EXHIBITIONS

Annual five-year calendar. S.M. Stevenson. 1:65.

Printing & Graphic Arts Meeting. 2:15.

77th Annual Meeting TS, CPPA. 3:43.

Process Control. 4:17.

Maintenance Conference Preview. 4:22.

NACE/STLE. 6:11.

Pacific & Western Branches Joint Conference. 7:15.

Estivale. 7:20.

International Pulp Bleaching Conference. 8:13.

International Mechanical Pulping Conference. 9:13.

Maintenance Conference. 9:29.

78th Annual Meeting TS, CPPA Preview & EXFOR. 11:10, 12:33.

Paper Physics. 11:21.

Environment. 12:16.

Recycling Forum. 12:25.

CONTROL. See ANALYZERS, PROCESS CONTROL.

CORROSION. Are corrosion and wear eating away at your bottom line? S. Jamieson. 6:11.

CPPA

Issues management will be the thrust for CPPA to follow. G. Rodden. 7:9.

Technical Section's year in review. C.B. Prosser et al. 3:45.

D

DE-INKING. See RECYCLING.

DERESINATION

Deresination of ultra-high-yield pulps. Part I: Piston press study. L. Morimanno et al. (T196) 8:32.

Deresination of ultra-high-yield pulps Part II: Screw press study. J. Alamo et al. (T217) 9:47.

DRAINAGE. Chemical additives and their effect on press fabric flow properties: Test methods. A. Renjilian. (T172) 7:22.

DRYING. Infrared applications in pulp drying. Goovaerts et al. (T267) 11:24.

E

ECONOMIC FORECAST. The outlook for the Canadian pulp and paper industry in 1991. K. McElhatton. 3:21. See also QUARTERLY RESULTS.

ECOSYSTEMS. Environment studies in the marine environment at

Skeena Cellulose. B. Wilkes et al. (T245) 10:20.

EFFICIENCY. Inside a kraft recovery boiler: Combustion of high-sulphidity black liquor at high dry solids. H. Bjorklund et al. (T206) 8:44.

Paper machine efficiency: The most important operating parameter; how to get it and how to keep it. Mardon et al. (T285) 12:87.

Paper machine efficiency: The most important operating parameter; how to get it and how to keep it: A commentary. G.P. Chinn. (T294) 12:98.

EFFLUENT TREATMENT/CONTROL (See also ENVIRONMENT)

Dissolved air flotation systems are cleaning up the difficult parts of Hallsta's effluent. O. Sanneskog et al. 5:28.

Modifying the bleaching process to decrease AOX formation. N. Liebergott et al. (T70) 3:84.

You don't have to treat your effluent nicely, you just have to treat it well. S. Jamieson. 5:21.

ELECTRICAL ENGINEERING

Application of vacuum contactors to medium-voltage motor controllers. D.S. MacLennan. (T116) 5:31.

Protection philosophy and relay selection for large AC motors. S. Khan et al. (T151) 5:97.

ENERGY

A method for mill energy management. K.A. Morrison. (T135) 5:81.

Power quality in industrial systems. A. Ludbrook. (T235) 9:67.

ENERGY CONSERVATION. Cut costs, save energy: Here's how it can be done. S.M. Stevenson. 5:13.

ENVIRONMENT (See also EFFLUENT TREATMENT, BLEACHING)

Will less brightness cure AOX blues? N. McCubbin. 8:48.

You don't have to treat your effluent nicely, you just have to treat it well. S. Jamieson. 5:21.

Airing some concerns: The next wave in pollution control. S. Jamieson. 10:12.

Effluent treatment is still the name of the game (conference). S. Jamieson. 12:16.

Reducing TOCl with the OxO process. Lachenal et al. (T297) 12:101.

EUROPE

Changes are reshaping the European paper and board industry. M. White. 9:35.

The trend in Europe is one of modernization and expansion. D. Price. 9:37.

EXFOR. See CONFERENCE (Annual Meeting)

F

FILTERS. Pressure disc filters in the recausticizing process. B. Sandvold et al. (T130) 5:76.

FINANCIAL RESULTS. 1:9; 4:7; 7:7; 10:7.

FORMING FABRICS. Newsprint formation and two-sidedness on Canadian multi-wire formers. R. Danby. (T139) 5:85.

FURNISH FORECAST. Future furnish requirements for newsprint and mechanical printing papers. J.W. Wood et al. (T21) 1:72.

G

GREENFIELD MILLS. See NEW MILLS.

H

HIGH-YIELD PULPS

Deresination of ultra-high-yield pulps. Part I: Piston press study. L. Morimanno et al. (T196) 8:32.

Deresination of ultra-high-yield pulps Part II: Screw press study. J. Alamo et al. (T217) 9:47.

I

ILLITERACY. What does illiteracy cost your mill? S.M. Stevenson. 2:10.

INFRARED. Infrared applications in pulp drying. Goovaerts et al. (T267) 11:24.

L

LASER PRINTING. Improved laser printing. N. McCubbin 11:46.

LUBRICATION. See CORROSION.

M

MAINTENANCE

Experience of lime kiln ringing problems at E.B. Eddy Forest Products. H. Tran et al. (T26) 1:78.

Advanced mechanical seal systems for pumps and agitators. R.H.

Koch. (T147) 5:93.

Are corrosion and wear eating away at your bottom line? S. Jamieson. 6:11.

Managing maintenance requires everyone's co-operation. P.N. Williamson. 9:29.

Minimizing maintenance costs and maximizing production running costs using a simplified vibration reduction. R.T. Buscarello. (T321) 12:127.

MATERIALS HANDLING. See WAREHOUSING.

MECHANICAL PULPING. Refiner capacity worldwide reached 89.5 kt/d in 1990. R. Leask. 3:27.

MODELS. Physical flow modelling of a vintage Combustion Engineering kraft recovery boiler. B. Blackwell et al. (T121) 5:67.

MODERNIZATIONS

Dryden boosts fine paper capacity to 285 000 t/y as Trillium joins the family. G. Rodden. 1:31.

B.C.'s oldest pulp mill is about to enter a new era. G. Rodden. 2:13. The ambitious coater project at Island Paper Mills is delivering what the market wants. S.M. Stevenson. 3:37.

Montreal's urban foresters are well positioned for the new business climate. S. Jamieson. 4:25.

Port Mellon revives as Howe Sound Pulp and Paper Limited completes a special newsprint mill. G. Rodden. 5:37.

Changing with the times gives Desencrages Cascades a competitive edge. S. Jamieson. 8:19.

Survival of the fittest with Kruger's PM 10. S. Jamieson. 10:10.

Millwide automation: Howe Sound and Peace River blaze the trail. R. Yeager. 12:28.

N

NEW MILLS

Peace River Pulp makes hardwood and softwood BKP under strict guidelines. S.M. Stevenson. 1:25.

Slave Lake Pulp Corp. makes bright BCTMP. S.M. Stevenson. 9:23.

NEWSPRINT

An overview of Q&O's operating experience using flotation deinked pulp as a furnish component of newsprint. M.G. Michaud et al. (T13) 1:57.

Pilot calendaring of newsprint using modern concepts. R.J. Futch et al. (T79) 4:35.

Upgrading of newsprint by surface treatment. N-O. Bergh et al. (T96) 4:52.

Technological responses to the future demands of printing processes. G.N. Ionides et al. (T91) 4:47.

Formation and two-sidedness on Canadian multi-wire formers. R. Danby. (T139) 5:85.

Soft-compact calender: In-line operation for improved newsprint qualities. P. Svenka. (T271) 11:28.

O

OCCUPATIONAL HEALTH & SAFETY

BC Research works for industry health. S.M. Stevenson. 1:12.

What does illiteracy cost your mill? S.M. Stevenson. 2:10.

Stora earns Class A award. S.M. Stevenson. 3:13.

It takes a lot of effort to build a safe, healthy workplace essential for high productivity. S.M. Stevenson. 4:10.

Beware — compressed air! S.M. Stevenson. 5:10.

Managing maintenance requires everyone's co-operation. P.N. Williamson. 9:29.

In-house asbestos management. Bonar et al. (T325) 12:131.

ON-LINE MEASUREMENT. The Paprican felt permeability tester. R.J. Trépanier. (T166) 6:57.

ONTARIO, NORTHWESTERN (supplement — D. Walsh. 8:SI).

Forest products industry a priority. 8:S2.

Environment in the spotlight... 8:S3.

...and so is recycling. 8:S4.

Local suppliers are well plugged in. 8:S7.

Co-generation helps bottom line. 8:S9.

In QUEST of millwide information. 8:S9.

Working together to beat the world. 8:S12.

Central Canada Industrial Exposition: A preview. 8:S13.

OPTIMIZATION. Factors affecting SBK usage at Rothesay Paper. C.E. McCumber. (T277) 11:35.

ORGANOCHLORINES. See BLEACHING, EFFLUENT TREATMENT, ENVIRONMENT.

P

PAPER GRADES. Coping with carbonate: Neutral pH rosin sizing. P.C. Rostek et al. (T169) 6:60.

PAPER MACHINES

A new web transfer system for closing the draw between the last press and the dryer section. J.D. McDonald et al. (T62) 3:75.

Valmet HHS Former: P.M. operating experience. M.W. Schneider. (T76) 4:30.

Valmet Speed-Former HHS. A. Malashenko. (T176) 7:27.

Paper machine efficiency: The most important operating parameter; how to get it and how to keep it. Mardon et al. (T285) 12:87.

Paper machine efficiency: The most important operating parameter; how to get it and how to keep it: A commentary. G.P. Chinn. (T294) 12:98.

PAPERMAKING

Calcium carbonate filler optimization for alkaline paper. M.D. Strutz et al. (T202) 8:39.

Factors affecting SBK usage at Rothesay Paper. C.E. McCumber. (T277) 11:35.

PAPER PROPERTIES/TESTING

Pulp and paper testing: The customer gets what the customer wants. S. Jamieson. 2:21.

Paprican felt permeability tester. R.J. Trépanier. (T16) 6:57.

A user's review of the Valmet Automation PaperLab™ 16. L. Lachapelle. (T179) 7:31.

PATENTS. De-inking, pitch reduction and control dominate patents. J. Merka. 11:14.

PHYSICS, PAPER. The physics of it all (Conference). C. Farnes-Barnes. 11:21.

PIPING SYSTEMS. Factors affecting the plane wave propagation of pressure waves in approach piping systems. P.N. Lamoureux. (T66) 3:79.

PITCH CONTROL

High chlorine dioxide substitution at Stora Forest Industries Ltd. R. Grundelius et al. (T87) 4:43.

De-inking, pitch reduction and control dominate patents. J. Merka. 11:14.

POTASSIUM COMPOUNDS. A novel sulphite pulping and chemical recovery system for small- and medium-scale pulp mills. A. Wong et al. (T184) 7:36.

PRESSING. See WET PRESSING.

PRINTING & GRAPHIC ARTS

Conference report. S.M. Stevenson. 2:15.

Technological responses to the future demands of printing processes. G.N. Ionides et al. (T91) 4:47.

PROCESS CONTROL

Bits and bytes and their accompanying hardware get aired in Orlando. P.N. Williamson. 4:17.

De-inking, pitch reduction and control dominate patents. J. Merka. 11:14.

Millwide automation: Howe Sound and Peace River blaze the trail. R. Yeager. 12:28.

PUMPING. Dynamic analysis of the approach flow system. M. Barasch. (T52) 2:49.

PULPING. Novel sulphite pulping and chemical recovery system for small- and medium-scale pulpmills. A. Wong et al. (T184) 7:36.

Q

QUALITY CONTROL. See PAPER PROPERTIES/TESTING.

QUARTERLY RESULTS. (results and analysis) 1:9; 4:7; 7:7; 10:7.

QUEBEC REPORT. Je me souviens running in the black. S.

Jamieson. 7:20.

R

RECEIVING WATERS. See ECOSYSTEMS.

RECOVERY

Application of modern recovery boiler instrumentation. B. Briscoe et al. (T41) 2:38.

A new analyzer for recovery boiler control. R. Sutinen et al. (T83) 4:39.

Physical flow modelling of a vintage Combustion Engineering kraft recovery boiler. B. Blackwell et al. (T121) 5:67.

A novel sulphite pulping and chemical recovery system for small- and medium-scale pulp mills. A. Wong et al. (T184) 7:36.

Inside a kraft recovery boiler: Combustion of high-sulphidity black liquor at high dry solids. H. Bjorklund et al. (T206) 8:44.

Development of a fluidized bed chemical recovery boiler. C. Nagai et al. (T258) 10:35.

Alternative air supply system for recovery boilers. E. Uppstu et al. (T48) 2:45.

RECYCLING

An overview of Q&O's operating experience using flotation de-

inked pulp as a furnish component of newsprint. M.G. Michaud et al. (T13) 1:57.

Montreal's urban foresters are well positioned for the new business climate. S. Jamieson. 4:25.

Changing with the times gives Desencrages Cascades a competitive edge. S. Jamieson. 8:19.

The place of recycling in fibre supply. B. Kerr. (T239) 10:14.

De-inking, pitch and control dominate patents. J. Merka. 11:14.

Packed First Recycling Forum draws international researchers. S. Stevenson. 12:25.

REGIONAL REPORTS

Montreal. S. Jamieson. 4:25.

Quebec. S. Jamieson. 7:20.

Northwestern Ontario: Supplement. See Ontario

Alberta: Special supplement. S.M. Stevenson, R. Milroy. 7:A1.

RESEARCH & DEVELOPMENT

Alcell pulping: World class research right here in Canada. S. Jamieson. 3:16.

It is with regret that the death is announced. S.M. Stevenson. 4:80.

R&D News: Mardon speaks out on R&D crisis (interview). R. Milroy. 11:47.

ROOFING. Design, repair and maintenance of flat roofing systems for the pulp and paper industry. R.J. Booth. (T9) 1:53.

S

SAFETY. See OCCUPATIONAL...

SEALS. Advanced mechanical seal systems for pumps and agitators. R.H. Koch. (T147) 5:93.

SENSORS. Application of modern recovery boiler instrumentation. B. Briscoe et al. (T41) 2:38.

SHOWERS. Steam showers in the machine calendering of newsprint. M.F. Gratton et al. (T107) 4:64.

Shower water quality. Renjilian, A. (T328) 12:134.

SIMULATION

SIMSMART: Synthetic Intelligence (SI): The integration of AI and simulation. D. Wayne et al. (T31) 1:83.

Selecting the right simulation tool for the job. S.K. Schroderus. (T36) 2:27.

Alternative air supply system for recovery boilers. E. Uppstu et al. (T48) 2:45.

Operator training at Great Northern. J. Terrell et al. (T103) 4:59.

The role of process system simulation in the design, testing and operation of processes, process control and advanced control systems. C.F. Shewchuk et al. (T222) 9:53.

A comparison of spreadsheet simulations: Iterative versus direct solutions. W. Frazier. (T253) 10:29.

SIZING

Coping with carbonate: Neutral pH rosin sizing. P.C. Rostek et al. (T169) 6:60.

Operator involvement led to a successful start up of E.B. Eddy's sizing system. R. Allain. 11:17.

Where simulation makes the difference. Wasik et al. (T302) 12:107.

SOLVENT PULPING. Alcell pulping: World class research right here in Canada. S. Jamieson. 3:16.

SULPHITE. Novel sulphite pulping and chemical recovery system

for small- and medium-scale pulp mills. A. Wong & G. Derald. (T184) 7:36.

SUPERCALENDERING. Steam showers in the machine calendering of newsprint. M.F. Gratton et al. (T107) 4:64.

SURFACE TREATMENT (See also CALENDERING)

Upgrading of newsprint by surface treatment. N.O. Bergh et al. (T96) 4:52.

Using blade coaters for upgrading wood-containing paper grades. S.W. Renvall et al. (T188) 8:23.

SWITCHES. Application of vacuum contactors to medium-voltage motor controllers. D.S. MacLennan. (T116)

SYSTEMS ENGINEERING. SIMSMART: Synthetic Intelligence (SI): The integration of AI and simulation. D. Wayne et al. (T31) 1:83.

T

TECHNOLOGY. Top picks (yearly round-up). S. Jamieson. 7:12.

TESTING. See PAPER PROPERTIES.

TRAINING

Operator training at Great Northern Paper. J. Terrell et al. (T103) 4:59.

Operator involvement led to a successful start up of E.B. Eddy's sizing system. R. Allain. 11:17.

TWIN-WIRE MACHINES. Valmet HHS Former: P.M. operating experience. M.W. Schneider. (T76) 4:30.

V

VALUE-ADDED PRODUCTS

The ambitious coater project at Island Paper Mills is delivering what the market wants. S.M. Stevenson. 3:37.

New products improve opportunities to add value to paper and board. P.N. Williamson. 8:9.

W

WAREHOUSING. The application of automated high-rise warehousing to the paper industry. H. Debor. (T317) 12:123.

WEB TRANSFER. New web transfer system for closing the draw between the last press and the dryer section. J.D. McDonald et al. (T62) 3:75.

WET END PIPING. Factors affecting the plane wave propagation of pressure waves in approach piping systems. P.N. Lamoureux. (T66) 3:79.

WET PRESSING

Wet pressing: History and future trends. H. Paulapuro et al. (T1) 1:41.

Deresination of ultra-high-yield pulps. Part I: Piston press study. L. Morimanno et al. (T196) 8:32.

Deresination of ultra-high-yield pulps Part II: Screw press study. J. Alamo et al. (T217) 9:47.

WATER POLLUTION. See BLEACHING, ECOSYSTEMS, EFFLUENT TREATMENT, ENVIRONMENT.

WEAR. See CORROSION.

WINDERS. New options for old winders. J.R. Ernst. (T17) 1:61.

WOOD HANDLING. The delivery of fresh wood to mill site: Stora Woodlands experience. A.M. Anderson. (T193) 8:28.

WOODROOM. New woodroom and chip thickness screening for Weyerhaeuser Prince Albert. L.R. McIntyre. (T56) 3:69.

**SEASONS GREETINGS
TO YOU ALL
FROM THE STAFF OF
PULP & PAPER
CANADA**
